

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

(LANCASHIRE)

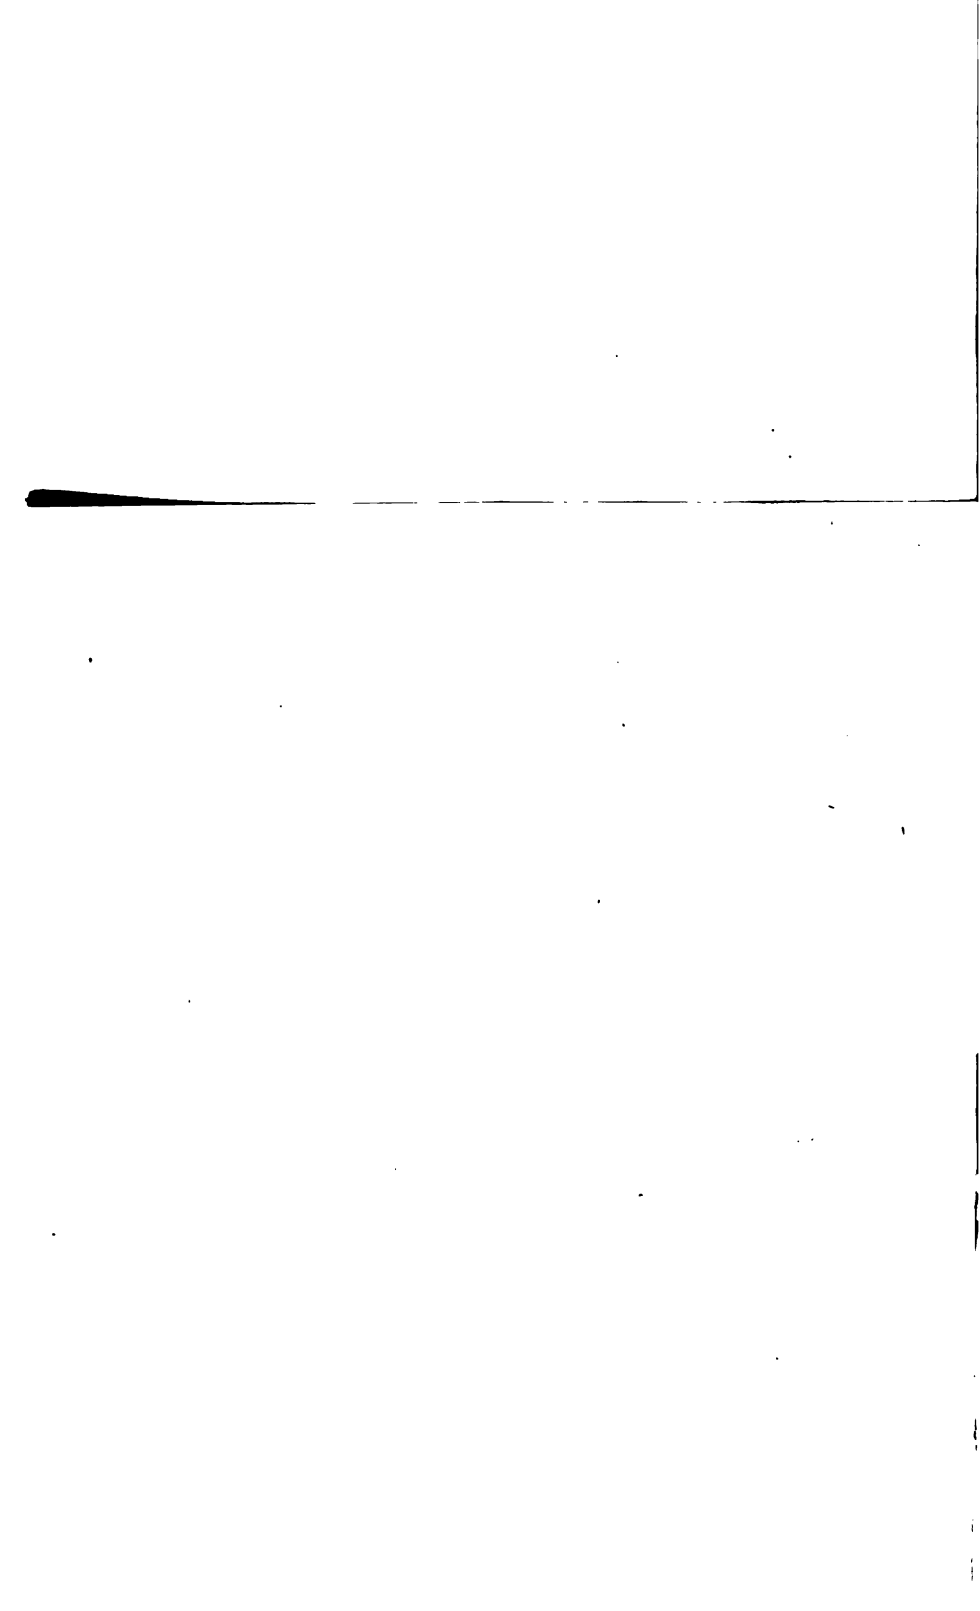

The publication of this Volume, the Second of the Society's series, has been delayed in order that VOL. IV., which contains the continuation of the Index of the Wills at Chester, between the years 1621 to 1650, might be issued, if possible, at the same time. This is now in the printers' hands, and may be expected in a few weeks.

INTRODUCTION.

PREVIOUS to the Reformation the two counties of Lancaster and Chester were included in the diocese of Lichfield and Coventry, and it was not till the year 1541 that the bishopric of Chester was created by Henry VIII. and endowed with some of the spoils of the dissolved monasteries. The diocese of Chester, as then created, comprised the whole of Lancashire and Cheshire, that portion of Yorkshire known as Richmondshire, with some other parishes in that county, part of Cumberland and Westmoreland adjacent to the north of Lancashire, and some parishes in Flintshire and Denbighshire lying near the borders of Cheshire. The early Lancashire and Cheshire wills were almost certainly proved at Lichfield,* but enquirers are informed that no early wills relating to these two counties are now to be found there, and it is suggested that they were taken away when the new diocese of Chester was created. I am, however, inclined to think that this is a mistake, and that a careful search in the Registry at Lichfield would bring to

* Some early Lancashire and Cheshire wills were proved at the Prerogative Court of Canterbury, and are now to be found at Somerset House, London, as the old diocese of Lichfield and Coventry was under the jurisdiction of the Archbishop of Canterbury. A few abstracts of these early wills made by Roger Dodsworth are to be found in vol. xx. of his MSS., in the Bodleian Library, Oxford, and the Lancashire ones have been transcribed by Mr. G. J. Piccope into vol. i. of his MSS., now in the Chetham Library, Manchester. A complete list of these *early* wills will probably be drawn up for this Society soon, and it is very desirable that all these and any other *early* wills from family muniments, &c., should be printed as soon as possible, as they frequently contain most valuable local information.

light much of great interest to the two counties, and I hope the day is not far distant when this work will be undertaken by this Society. After the creation of the new bishopric the wills were proved at Chester, with the exception of those in the north of Lancashire, Richmondshire, and the parts of Cumberland and Westmoreland included in the diocese of Chester, which were proved at Richmond in Yorkshire. Hence persons seeking for the wills of persons living in those districts will rarely if ever find them amongst those proved at Chester. The Richmond wills were a few years ago removed to Somerset House, London, and arrangements are in progress by which it is hoped that the list of the Lancashire wills there preserved will shortly be printed by this Society.

The wills at Chester were originally proved in the Bishop's Court there, and were preserved in the Bishop's Registry down to comparatively modern times. The "Old Registry," as it was called, was taken down more than a century ago, and the wills were then transferred to the present Bishop's Registry, over the Abbey Square Gateway. From here they were taken in 1847 to what is now the house of the Head Master of the King's School, and in 1861 they were removed to the newly-established Court of Probate in White Friars. Here they remained till, in the autumn of 1880, they were transferred to the present Probate Court, also in White Friars, but on the opposite (southern) side of the street. It was not customary at Chester to transcribe the wills (as was the case elsewhere) into large folio volumes, and consequently when a will before 1838 is required the original has always to be produced. These original wills appear to have been cared for at Chester in pretty much the same sort of way as they were in most of the other Bishops' Courts throughout the country. They were packed away in most unsuitable places—in garrets where the rain coming in spoiled very many, whilst others were nibbled by rats or mice; or in cellars where they were slowly but surely destroyed by damp. Considering how they were treated, it seems almost wonderful to find so many still in existence. Indices were

made from time to time, and a comparison of the entries in them with those in the modern Indices show a great many wills to have disappeared.

But nothing shows the number of the lost wills so much as an examination of what are known as the ACT BOOKS. These books, which commence in 1596, contain entries of all the wills proved before the surrogates, who, throughout the two counties, were appointed by the Chancellor as his representatives. Each entry occupies from three to five lines, giving the date, the name, and place of abode of the testator, and the name of the person or persons, who as executors or representatives proved the will, or took out letters of administration. These Act Books, therefore, give a great deal of useful information, and in all genealogical enquiries they have to be consulted; for in the many cases where the will there stated to have been proved is not now extant, they afford evidence of a person's death, and may supply the name of his wife, son, daughter, or other relation who proved the will. The earliest of these books commences with September, 1596, and goes down to 1608;* the second commences in 1609, and so on down to 1858. The series is, however, not quite consecutive, one or more volumes being missing. The value of these Act Books is very great, and they well deserve to be indexed, so that they might be far more frequently referred to than they are now.

When the wills were removed from the Bishop's Registry in 1847, the Record Keeper was at the trouble to make an Index to them, so as to enable any will to be the more readily found. This Index was not based on any of the older ones,† nor copied from them, but was an entirely independent one, being an Index to those wills only, which were then and are now preserved in the Probate Court.

* In this volume after 18 Sept., 1602, come several pages, 11 July, 1608, to 6 July, 1609, which have been inserted there in error when the volume was re-bound. These pages should come at the end of the volume.

† The early original Index still preserved gives the wills arranged under the *Christian* name, that is to say all the Roberts, the Johns, &c., together under each year, and without any description of the testator's place of abode or of his rank in life.

It necessitated the examination of each will by itself, and hence it is by no means surprising that the old handwriting, and in many cases the wretched caligraphy, have caused many mistakes to appear in the Index, owing to the names having been misread, but one is only too willing to pardon any such errors in consideration of the great boon this Index has been to all searchers in the Probate Court. Up to the year 1600 inclusive the wills in this Index are arranged under the respective letters of the alphabet, and the wills themselves are preserved in large bundles. Hence it follows that when any will before 1600 is asked for, the bundle for that letter has to be looked at, untied, and searched through till the particular will enquired for is found. In the case of certain letters, such as B, W, &c., the number of the wills is so large that two or even three bundles are necessary. In such cases the bundles are distinguished by the letters A, B, C, and these letters are placed in the Index after the date of the will. This method of preserving the early wills is by no means satisfactory, as the constant opening, tying up, and examination of all those in each bundle, every time a single will is required, is very detrimental to their preservation, especially as many of them are from age and other causes already in a very brittle condition. It is much to be desired that they should be arranged under years as well as alphabetically, and this could now easily be done with very little trouble. Subsequent to 1601 the wills are arranged alphabetically under each year, and are tied up in small bundles arranged in a similar manner. The first volume of this MS. Index goes down to 1638 inclusive, and the second from 1639 to 1669, there being a break for the years 1650 to 1659, when all the wills were obliged to be proved in London. After 1669 the old Index containing the wills from 1660 to 1673 is still in use, as well as another containing those from 1674 to 1689. After that date there are old Indices lettered A, B, C, &c., A containing the wills from 1690 to 1701, B those from 1702 to 1727, and so on; and there is a General Index of names, referring to these volumes under these letters, as A page 200, B page 150, and so

on, being a complete list of all the wills from 1690 to 1823, arranged alphabetically. After this date there are modern Indices for the various years.

In 1879 the Council of this Society presented a memorial to Sir James Hannen, President of the Probate Division of Her Majesty's High Court of Justice, pointing out the value of the Indices to the wills at Chester, and desiring permission to print them, which permission was very kindly accorded to the Society. The result is the present volume, and that for 1880 issued with it; and it is to be hoped that others will appear from time to time, until all the Indices at present existing in MS. are in print.

The method of procedure used in this volume, and in its companion volume, is as follows:—The two MS. Indices above referred to were carefully transcribed, the year of probate being added after each entry. The names from the earliest date up to the year 1620 were then arranged in strictly alphabetical order, and are here printed; and subsequently those from 1621 to 1650 were arranged in a similar manner for the volume now in the press. Hence these two volumes give at a glance the complete list of all the wills belonging to any one family proved at Chester between the years 1545 to 1620, and 1621 to 1650 respectively. As the pages were passing through the press, many errors of name, &c., unavoidably introduced as already explained in making the MS. Indices, were corrected, whilst others which were noticed too late will be found in the Appendix on p. 222. These, however, I know by no means exhaust such as exist, and I shall be very glad to receive an intimation of any which may from time to time be detected.

So far we have been dealing with the wills now to be found in the Probate Court at Chester; but as many valuable early local wills are to be met with elsewhere, these deserve to be here specially noticed.

In the Bishop's Registry at Chester, in the rooms over the Abbey Square Gateway, is preserved a large folio volume, which contains, in addition to the record of sentences of divorce, and copies of various ecclesiastical docu-

ments, full transcripts of a number of sixteenth century Lancashire and Cheshire wills, the originals of nearly the whole of which are now lost. In its present state it has 411 leaves, but searching amongst the miscellaneous records in this Registry, I was fortunate enough to discover a thin volume of some seventy leaves, which had originally belonged to it, and which continued the pagination from page 412 to page 483. This had evidently been detached for many years, the volume having been re-bound without it. It is now, however, placed with it, and the transcripts of the wills there copied are included in the following list. This volume is the earliest of the series known as "The Enrollment Books" from the copies of the various ecclesiastical documents which they contain. There are transcripts of wills in most of them, the later ones having fewer than the earlier ones, but it is only those contained in the first and second volumes which come within the limits of this book. As the fact of wills being transcribed in these volumes is not generally known, these two books have been carefully examined, page by page, and the following is the complete list of the wills to be found in them, with a reference to the pages upon which they occur. The writing is that of the sixteenth and seventeenth centuries, and very legible. It is to be noted that Harleian MS. 2067, in the British Museum, contains a large number of seventeenth-century transcripts of wills from these volumes, together with copies of a few other wills which at that date were preserved in the Bishop's Registry. Of these it is possible that one or two may be no longer existing, but I have not had an opportunity of going through this volume carefully enough to ascertain this.† As will be subsequently explained, the marks * and § attached to some of these wills indicate that they have been printed, in the former case by the Chetham Society, and in the latter in the pages of "The Cheshire Sheaf," edited by Mr. Thomas Hughes, of Chester.

† I have a note of an interesting will of John Haughton, of Manchester, dated 11 Aug., 1577, which is there copied, but which I cannot trace as being either in the volumes in the Bishop's Registry or now in the Probate Court, so that it is possible there may be others.

In the years 1854, 1860, 1861, the Chetham Society printed three volumes of transcripts of wills, preserved at Chester, copied from the originals by the Rev. John Piccope, and edited by his son, the Rev. G. J. Piccope. When Mr. Piccope transcribed these wills they were all preserved in the Bishop's Registry, and hence he describes them somewhat vaguely as being from "the Ecclesiastical Court of Chester." Some of them were copied from those preserved in the Enrollment Books (described on p. viii.), and such as are so printed are marked in the above list by an asterisk. The great majority, however, were copied from the original wills, and, as will subsequently be shown, many of those which Mr. Piccope examined and copied are not now to be found. As the wills printed in the Chetham Society volumes are not arranged in any definite way, it has been thought desirable to arrange the names

in alphabetical order and to print the list here, so that those wills which are there printed might be easily found. The volume and page for each will must be looked for in the index, printed at the end of the third volume. The marks * and † in the following list indicate that in the first case the original will is still preserved in the Probate Court (and so will be found recorded in its place in the pages of this book), and in the second that there is a transcript of the original will in the Enrollment Books in the Bishop's Registry. The originals of those wills to which there is no mark are now missing.

In the above list, as already explained, those wills to which no mark is placed are those which cannot now be found either in the Bishop's Registry or at the Probate Court. Mr. Piccope's MSS. are preserved in the Chetham

Library, Manchester (together with those of his son, the Rev. G. J. Piccope), and the importance of the fact that a certain number of the wills which he had copied were missing, induced me to make a very careful examination of these MSS. in order to ascertain whether any others had similarly disappeared. And greatly to my astonishment, I found that a very large proportion of the wills which these two antiquaries examined have since then been lost or destroyed. How this has arisen it is not for me to say, but there can be no doubt that there has been great carelessness somewhere, as the loss or destruction of such valuable documents is inexcusable, and it is sad to think that this has occurred during the past forty or fifty years. As already stated these wills have been moved since the Messrs. Piccope saw them, and it is possible that it was during or prior to this removal that the loss occurred. Whether any were destroyed as being torn or injured, or as rendered illegible by damp, or whether some may yet be hidden away amongst the mass of uncalendered documents in the Bishop's Registry, it is not easy to say, but that they are not now to be found at the Probate Court is the one discovery which must ever be a matter of regret. How many of the other wills which these antiquaries never looked at may be missing cannot of course be stated; but supposing that they only examined a hundredth part of those then in the Registry, and a tenth of what they did examine are now missing, it will follow that the total number lost must be very great.

The Piccope MSS. show that the Rev. J. Piccope and his son, the Rev. G. J. Piccope, must have examined between them from 1,200 to 1,500 wills, including those printed by the Chetham Society, and of these about 200 cannot now be found! Of most of the missing wills they have only preserved the briefest genealogical abstracts, but in a few cases the will has been copied in full. The importance of these abstracts, however brief they are, cannot be over estimated, and it is much to be hoped that they may be printed at once by either the Chetham or the Record Society. Once in print they are preserved for ever,

whilst at present any unlucky accident may cause these abstracts to disappear like the original wills have done.

Of the three volumes amongst the Piccope MSS. which contain wills, the two largest are numbered vols. 8 and 9 in the series. These contain the transcripts of those wills which were printed by the Chetham Society, together with a few others (nearly fifty in all) which for some reason or other were not deemed of sufficient importance to be printed. They are, however, transcribed in full, and are quite ready for the press. The other, vol. 10, is oblong in shape, and contains brief genealogical notes of the wills examined by one or other of these antiquaries. In the following list the references (p. 81, p. 73, &c.) are all to this latter volume, the figure denoting the page of the MS. where the abstract is to be found. In the case of a will copied in either of the other volumes, it will be found specially referred to as such.

Among the Harleian MSS. in the British Museum is a large quarto volume numbered No. 1991, which contains a number of legal transcripts of Inquisitions post mortem, wills, &c., many being on parchment or vellum. They are without doubt contemporaneous copies of the original documents, and so possess an almost equal authority to the originals themselves, in the cases where the latter are now missing, as they were evidently made for legal purposes, and probably to be placed with other family deeds and papers. In the case of the wills some of these may have been the official probate copies. There are forty-two wills in this volume, of which twenty-seven are full copies of the originals, and, in the case of the remaining fifteen, which are those of benefactors to the city of Chester, extracts relating to these benefactions alone are given. Of the latter the original wills are nearly all now to be found in the Probate Court, but out of the former very few of the originals are now to be met with there. These wills, with one or two exceptions, are those of persons resident in Chester and the immediate neighbourhood, and it is very noteworthy how many Gamull wills are there preserved. They were evidently collected by one of the Randle Holmes', the well-known Chester antiquaries and heralds. In the following list the mark * signifies that the original will is *not* now extant at the Probate Court :—

Among the other MSS. of the Randle Holmes' now forming part of the Harleian MSS. in the British Museum, many copies or abstracts of Lancashire and Cheshire wills are to be met with. To have searched for all these, however, would have involved so much delay and expense that the idea of doing so had to be abandoned. Many other wills or official transcripts not unfrequently occur among family muniments or in private hands, and I shall be much obliged in any cases where it appears from this List that the originals are not now to be found at the Probate Court, if their present owners will kindly communicate with me, so that a list of the wills in private hands may be drawn up, or better still, that transcripts or abstracts of them may be made so that they may ultimately be printed, and so permanently preserved.

It must also not be forgotten that, for various causes somewhat difficult to explain in a concise manner, many Lancashire and Cheshire wills were proved in the Archbishop's Courts at York, and now form part of the splendid series of wills there preserved. The diocese of Chester, when it was created in 1541, was placed under the jurisdiction of the Archbishop of York, but as that of Lichfield and Coventry belonged to Canterbury, few if any Lancashire and Cheshire wills earlier than 1541 are to be found at York. If permission could be granted, it is much to be desired that an Index of all the wills there, which relate to these two counties, should be printed by this Society.

In bringing this long Introduction to a close, it only remains for me to express the indebtedness of the members of this Society to Sir James Hannen, President of the Probate Division of Her Majesty's High Court of Justice, for permission to print this Index; to C. T. W. Parry, Esq., the District Registrar of the Probate Court at Chester, for the facilities he afforded to the person employed to transcribe the MS. Indices; and to John Gamon, Esq., the

Registrar of the Bishop's Court at Chester, for permission to examine the old volumes of transcripts there preserved. I am also under many obligations to Mr. Charles Foden, the Record Keeper in the Probate Court, who, as far as his time would possibly permit, has verified the names and dates in any doubtful cases which I submitted to him ; and also to Mr. George Moss, the chief clerk in the Bishop's Registry, for his uniform attention and kindness. My thanks are also due to my friend Mr. J. Paul Rylands, F.S.A., who has accompanied me on my numerous visits to Chester, and has assisted me whilst searching in the Probate Court and Bishop's Registry there, and in many other ways.

J. P. EARWAKER.

WITHINGTON,
NEAR MANCHESTER.*

* After March, 1881, address PENSARN, ABERGELE, N. WALES.

THE following points are commended to the attention of those using this book:—

1. *This list is a very careful transcript of the MS. Index now in use at the Probate Court, Chester, compiled from an examination of the original wills, undertaken some twenty or thirty years ago by the Record Keeper there. That Index, however, is a chronological one, whilst in this the names have been arranged alphabetically.*

2. *As already explained in the Introduction, many of the errors incident to the compilation of such a MS. Index, chiefly consisting of mis-readings of the names of persons and places, have been corrected in this list, but others have been unavoidably left, as it was not possible to revise them without a fresh examination of the wills themselves—a task involving great trouble and expense. It is, however, believed that these errors are neither very numerous nor important.*

3. *In some cases inventories appear to have become detached from the original wills, and have so been placed in different bundles and indexed under different years. This list, however, being an alphabetical one, such cases will be speedily detected, and it will be easy to replace the inventories in their proper places.*

4. *Where the word "Inv" occurs, it signifies that the deceased had most probably died intestate, and that an inventory of his goods had been filed and administration granted to his representatives. Where the word "Admon" occurs it shows that an administration bond had been filed as well. In all other cases the wills themselves are extant, either with or without the accompanying inventories.*

5. *It is to be noted that in the Probate Court of Chester the original wills up to 1838 (and not official transcripts, as in many other Probate Courts) are those shown to enquirers.*

6. *Owing to the original spelling of the wills having been followed in the MS. Index, and allowing for possible mis-readings, enquirers are particularly desired to search for any name bearing a resemblance to that they are looking for, as for example Leigh for Legh or Lee, Newall for Nowall, Houghton for Haughton, &c., &c. As far as possible this has been indicated by cross references in this list. Words now spelt with an i then frequently had y.*

7. *This list extends from the earliest date of any will now preserved at the Probate Court, about 1545, to 1620 inclusive. The later years will follow in subsequent volumes. This volume alone is an index to about eleven thousand wills.*

ADDENDA ET CORRIGENDA.

THE following may be taken as a specimen of the character of the additions and corrections to which this volume is particularly liable. As explained in the Introduction, this book is merely a copy of the MS. Index now in use in Chester, which was compiled in a very hurried manner by a gentleman not very conversant with the old handwriting, in addition to which the bad character of the writing has in many cases rendered it very difficult to decipher. These corrections, &c., have been obtained by the editor from various sources, and are simply printed here that those who may use this volume may insert them in their proper places. Those who may take the trouble to compare this volume with the MS. Index will see that many similar corrections have been made as these pages were passing through the press. The corrections, additions, &c., are printed in italics:—
